SAMIHA HOSSAIN

+880-1886705405 | hsamiha2020@gmail.com | linkedin.com/in/samiha-hossain-b892271ab

PROFESSIONAL SUMMARY

Software and QA Engineer experienced in Playwright, React.js, TypeScript, and JavaScript. Builds scalable applications and performs automated and manual testing to improve software quality, reliability, and performance.

TECHNICAL SKILLS

Programming Languages: JavaScript (ES6+), TypeScript
Frontend Development: React.js, React Native, Redux.js, HTML, CSS
Testing and QA: Playwright, UI Automation, Manual Testing, Functional Testing, Regression Testing, Smoke Testing, Exploratory Testing, Cross-Browser Testing, Responsive Testing, User Acceptance Testing, Test-Driven Development
API and Data: REST APIs, Postman, JSON, MongoDB, CRUD Operations
Platforms and Tools: Corteza, GitHub, Microsoft Excel

CORE COMPETENCIES

Analytical Problem-Solving | Attention to Detail | Time Management | Multitasking | Cross-Functional Collaboration | Independent Work | Team Delivery

PROFESSIONAL EXPERIENCE

Associate Software Engineer | SELISE Digital Platforms
January 2025 – Present

- Built responsive, scalable user interfaces with React.js, TypeScript, and JavaScript (ES6+), improving application performance and user experience.
- Managed application state with Redux.js to improve data-flow consistency, scalability, and maintainability.
- Developed reusable UI components and integrated REST APIs and third-party APIs to deliver dynamic, data-driven applications.
- Built and maintained business applications on Corteza, delivering scalable workflow automation and reliable business processes.
- Optimized frontend performance through efficient component design, state management, rendering, and API usage.
- Diagnosed and resolved complex frontend and backend issues, improving application stability and reliability.
- Developed and maintained Playwright automation suites using TypeScript and JavaScript, increasing test coverage and reducing manual testing effort.
- Applied UI testing, automated testing, and test-driven development (TDD), enhancing the automation framework for maintainability and faster execution.
- Designed and executed test cases, test scenarios, and test data from business requirements, covering functional, regression, smoke, exploratory, cross-browser, and responsive testing.
- Validated REST APIs with Postman by verifying requests, responses, data integrity, status codes, and backend behavior.
- Logged, tracked, and verified defects in GitHub; supported root cause analysis of production issues and confirmed fixes through targeted testing.
- Produced test execution reports to communicate product quality, defect status, and release readiness.
- Participated in code reviews, testing, and deployments to maintain software quality standards throughout the development lifecycle.
- Worked in Agile/Scrum ceremonies, including sprint planning, backlog refinement, daily stand-ups, and retrospectives, collaborating with developers, QA engineers, product managers, designers, and stakeholders.
- Implemented AI capabilities in production software using large language model (LLM) APIs, open-source models, and model fine-tuning workflows.
- Applied system design principles, SQL and NoSQL databases, and API management practices to build scalable, maintainable software solutions.

- Built complex software solutions from the ground up for e-commerce and real estate use cases, working independently in fast-paced environments with minimal supervision.
- Solved complex engineering challenges through rapid prototyping, debugging, and iterative delivery, leveraging Claude Code and OpenAI Codex to accelerate development workflows.

Developer Intern | SELISE Digital Platforms
October 2024 – January 2025

- Designed and developed the SELISE Procurement Management System, streamlining procurement workflows and automating approval processes.
- Implemented inventory management features to track assets, supplies, and stock levels.
- Built modular business applications with Corteza and assisted with REST API development, integration, and testing.
- Performed manual, functional, and regression testing; documented defects and verified fixes.
- Collaborated with stakeholders in Agile/Scrum ceremonies and contributed to technical documentation and user guides.

Junior Support Engineer | InNeed Intelligent Cloud
May 2024 – October 2024

- Provided technical and application support for the TB Management Information System, maintaining reliable operations and user support.
- Performed manual, functional, and user acceptance testing; created and documented test scenarios, cases, and validation results.
- Reported, tracked, and verified defects in collaboration with development teams.
- Validated, analyzed, and reported data in Microsoft Excel while maintaining large operational datasets.
- Supported user onboarding, access management, troubleshooting, and cross-functional project coordination.

React Developer Intern | Shark and Hawk Tech
January 2023 – May 2023

- Built a React.js to-do application using component-based architecture, hooks, props, state management, and responsive interactions.
- Tested REST APIs with Postman and integrated frontend applications with backend services using HTTP and JSON.
- Used MongoDB for CRUD operations and gained experience with NoSQL data modeling.
- Debugged application issues and collaborated with team members in an Agile development workflow.

EDUCATION

Bachelor of Science in Computer Science and Engineering
American International University-Bangladesh | Major: Software Engineering
